

Stone Cottage

A quaint stone cottage based a bungalow in the original Bayko Construction set book. Here built using original parts from pre-WW2 sets together with our extended stone tiles showing the versatility of our extended parts.

The stone wall surrounding the cottage is capped with wall cappings from the extended parts selection.

Top the cottage off with either a red roof, or a thatched roof and stone chimney.

Parts list show parts for part brick, part stone tiles.

Ground Floor
